Diego Caínzos

Valencia, Spain · dgarciacainzos@gmail.com · 664 41 05 02 · diegocainzos.cv · diegocainzos · diegocainzos

Professional Summary

AI Engineer specializing in building AI solutions with a hybrid profile spanning software development, Data Science, and systems deployment. Experienced with Python, Machine Learning, Docker, and Linux. Explore my projects, live demos, and deployed AI architectures at diegocainzos.cv.

Experience

Navertia, AI Engineer — Valencia, Spain · Hybrid
Apr 2026 – present
6 months

- Designed and implemented an end-to-end bidirectional customer-service voice agent, deployed to production to address saturated phone lines using Pipecat, Deepgram, ElevenLabs, and the Gemini API.
- Deployed local infrastructure with vLLM and Docker on two NVIDIA RTX 5090 GPUs to serve MiniMax M3, Gemma 4, and DeepSeek V4, RAG systems, and private Open WebUI portals.
- Developing a pipeline that processes emailed invoices with locally served OCR, extracts accounting fields, and prepares integration with Microsoft Dynamics 365 Business Central.

Traffic and Road Safety Institute — Universitat de València, Data Analyst Intern — Valencia, Spain
Oct 2023 – June 2024
9 months

- Processed, cleaned, and analyzed data with Python and prepared documentation and reports for institutional mobility and road-safety projects.

Projects

Football Bias — End-to-End NLP Pipeline — 2024
GitHub · Live application

- Built and deployed with Python, AWS, Docker, and Streamlit a pipeline to ingest, transform, and analyze sports-news text using NLP.

Education

MS **Universidad Nacional de Educación a Distancia (UNED)**, Natural Language Processing — Online
Oct 2025 – present

- Coursework completed; master's thesis pending submission.
- Transformers with Hugging Face, neural-network architectures with PyTorch, and classical machine learning with scikit-learn, including trees and SVMs.

BS **Universidade da Coruña**, Computer Science — Data and Software — A Coruña, Spain
Sept 2020 – June 2024

- Hybrid focus on data and software development. Thesis: music genre classification · PDF.

Skills

AI and Machine Learning: PyTorch, Hugging Face, scikit-learn, NLP, RAG, vLLM, LangGraph, LangChain

Engineering and platforms: Python, Docker, PostgreSQL, REST, Linux, Git, AWS, Open WebUI

Data and analytics: SQL, pandas, Azure, Streamlit, Power BI

Languages

Proficiency: Native Spanish · C1 English · B2 Portuguese · A2 Italian
